All Purpose
Slow Release Plant Food

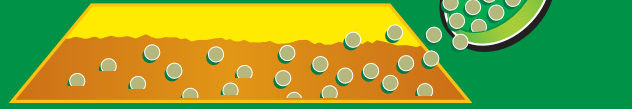

Net Wt. 8 lb (3.62 kg)

Shake 'n Feed™

All Purpose
Slow Release Plant Food

Miracle-Gro® Shake 'n Feed™ All Purpose Slow Release Plant Food is applied **dry**, directly to the soil around your **outdoor** plants every 3 months. It supplies the nutrition your plants need for beautiful results in your garden. Miracle-Gro® Shake 'n Feed Slow Release Plant Food is great for all your outdoor plants and flowers because it is:

High Quality: Unlike many other slow release plant foods, each Miracle-Gro® Shake 'n Feed prill contains all three vital NPK nutrients (Nitrogen, Phosphorus, and Potassium) that are so important for vibrant blooms, lush foliage, and strong root growth.

Safe: Miracle-Gro® Shake 'n Feed is a patented plant food that provides nutrients to your plants for up to 3 months – so there's no chance of overfeeding or burning your plants when used as directed.

HOW MUCH TO USE

Using a dime as a size reference, this illustration shows the amount of Miracle-Gro® Shake 'n Feed Plant Food you should sprinkle **evenly** on the soil around your plants. It is equal to 1 scoopful for every 2 ft. x 2 ft. of outdoor garden area.

DIRECTIONS FOR USE

Apply Miracle-Gro® Shake 'n Feed All Purpose Slow Release Plant Food **dry**, sprinkling directly on the soil around your outdoor garden bed plants. Apply only as directed.

Never mix in a watering can and **never** use in a hose-end feeder.

ALL OUTDOOR FLOWER and VEGETABLE GARDENS, TREES and SHRUBS

New and Existing Outdoor Garden Beds - Apply as shown in photo (1 scoopful for every 2 ft. x 2 ft. area) and be sure to work into the soil **prior** to planting new flowers or vegetables. During bed preparation of existing plants, apply to the soil prior to applying mulch.

New and Existing Trees and Shrubs - For trees and shrubs, simply apply 1 scoop of plant food for every 2 ft. x 2 ft. area in the landscape bed. Many trees and shrubs can have extensive root growth, so apply Miracle-Gro® Shake 'n Feed Plant Food to the soil beyond the spread of the branches of your trees or shrubs.

NOTE: Miracle-Gro® Shake 'n Feed Plant Food is for **outdoor** garden bed use only. For **outdoor** container plants or **indoor** plants, we recommend using Miracle-Gro® Water Soluble All Purpose Plant Food which has been formulated to meet the special needs of these plants.

For Best Results:

- Be sure to work Miracle-Gro® Shake 'n Feed Plant Food into the top 1-3 inches of soil or mulch. This delivers the nutrients directly to the plant's root system.
- After applying, water in thoroughly. Watering is beneficial for two reasons: it starts the Miracle-Gro feeding process and it settles the soil around new plants – eliminating air pockets that might allow roots to dry out.

Easy-to-Refill (For use with the Miracle-Gro® Shake 'n Feed Plant Food 4.5 lb. jug)

1. Press firmly through circle and tear it away from overcap.
2. Unscrew and remove nozzle. Place inverted overcap onto jug opening.
3. Refill jug by pouring product from Miracle-Gro® Shake 'n Feed Plant Food refill bag.

MIRACLE-GRO® FAMILY OF PLANT FOODS

The beauty of gardening is that each gardener is unique and has discovered the individual feeding schedule that best fits their lifestyle. So if you can't spend as much time in the garden as you'd like or if you find it's the place you most often want to be, Miracle-Gro has a plant food to consistently meet the nutritional needs of your garden, whatever your lifestyle.

Miracle-Gro® Shake 'n Feed Slow Release Plant Food... Just apply every 3 months to provide **CONSTANT NUTRITION** for the **continuous growth** of all your garden bed plants.

OR

Miracle-Gro® Water Soluble Plant Food... Simply apply at least every other week with a hose-end feeder or watering can to provide your plants with the **INSTANT NUTRITION** needed to see **fast results** in days.

For over 50 years, generations of gardeners have trusted their gardens to Miracle-Gro... so when you use any of the plant foods in the Miracle-Gro® family, you are providing your garden with the nutrition it needs to give you beautiful garden beds filled with brilliant color, lush foliage and abundant harvests.
